Here is the educational philosophy behind these activity sheets.

- A packaged approach of differentiated sheets to cater for students requiring additional support (via literacy and/or numeracy scaffolding) as well as challenging activities for those students needing extension (via multi-step problems involving critical and creative thinking skills).
- Deliberate mix of curriculum content/skills across literacy/numeracy/science/HASS, with an emphasis on a thematic approach to engage students rather than a focus on specific skills/topic areas. This encourages students to apply their knowledge/skill set across a number of different scenarios and discourages students from compartmentalising their learning.
- Mix of answering styles, including multiple-choice (like NAPLAN), short answer and mathematical calculations.
- Use of cognitive verbs.
- Incorporation of reading, spelling, grammar and punctuation skills as needed for NAPLAN.
- Data analysis questions.
- Clear format with a defined marking scheme or automatic marking for ease of use.
- Perfect for use as homework sheets and as classroom activities for different ability levels.
- All three versions of the sheet could be used differently across a number of year levels depending on students' needs.
- Activity sheets can be printed or used on any computer with automatic marking
- They are very suitable in traditional learning environments but also appropriate for a multi-age, high-top or home-schooling situation.
